

MAJOR RADIOACTIVE SPILLS OF LIQUIDS AND SOLIDS

In the event of a major spill:

- 1** If possible to do so safely, place something over the spill that will prevent it from spreading. *Do not attempt to clean up the spill.*
- 2** Clear the area of all personnel. Dial **88** and ask for Health Physics to report the spill.
- 3** Lock the room and remain nearby to alert others of the spill while waiting for emergency responders.
